# Panel PC Touch 21" i5

## GENERAL FEATURES

Industrial touch-screen panel PC, perfect to be used as supervisory PC for CNC or PLC machines requiring CAD/CAM systems, 3D simulators, or integrated optimizers.

The PC has a one-piece metal case, which also acts as a heat sink and can be fixed to the wall through designated holes.

Its computing power and high expandability make it a product suitable for several applications, even on medium-complex machines.

The PC is compatible with Windows 10 and Linux and can be supplied without an operating system or with Windows 10 Iot LTSB.

## PERFORMANCE AND SPECIFICATIONS

| | |
|---|---|
| **Colour** | Silver/Black |
